The SMART Suite

- **sReg:** A Bi-directionally Integrated Electronic Check-in Solution for the Hotel Front Desk
- **sRemote:** A Bi-directionally Integrated Early Check-in Solution for the Guest to check-in Remotely (future functionality)
- **sTraveller:** A Bi-directionally Integrated Guest App – The Perfect Guest Companion (future functionality)
- **sConsole:** A Management Console to provide Management with all the Information at a Click of a Button

sReg – The Electronic Check-in Solution

sReg provides a cost-effective electronic check-in service for use at the front desk or as a mobile check-in facility within the hotel. sReg is bi-directionally integrated into popular PMS systems providing seamless bi-directional data exchange.

- Elimination of the Paper-based Check-in Process
- Enhancement of Guest Information in the PMS System
- Secure Storage of Electronic Registration Cards
- Zero-Risk Implementation – SaaS setup without Lengthy Contracts

sReg – Functional Features

- Electronic Check-in
- Verification of existing PMS Guest Data
- E-Signature (using electronic signature pad on terminal)
- X-sell Opportunity for In-house Services
- Encrypted PDF-Registration Card with Electronic Guest Signature
- Management Reporting via **sConsole**
- Secure Passport Scanner – Appended to Reg. Card or Stored Separately (future functionality)

sReg – System Features

- Software as a Service (SaaS) setup
- No System Maintenance
- sReg Terminals secured via **SMARTSecure**
- PDF Registration Cards stored securely in **sVault**
- GDPR compliant (no storage of personally identifiable information)

sRemote – The Remote Check-in Solution

sRemote provides a cost-effective remote electronic check-in service, allowing the guest to check-in 24 hours prior to arrival. A link can be added to the confirmation letter, allowing for the guest to check-in remotely.

sRemote is bi-directionally integrated into popular PMS systems providing seamless bi-directional data exchange.

- Elimination of the Paper-based Check-in Process
- Enhancement of Guest Information in the PMS System
- Secure Storage of Electronic Registration Cards
- Zero-Risk Implementation – SaaS setup without Lengthy Contracts

sRemote – Functional Features

- Electronic Check-in
- Verification of existing PMS Guest Data
- E-Signature – either signed remotely or can be signed using sReg on premise.
- X-sell Opportunity for In-house Services
- Encrypted PDF-Registration Card with Electronic Guest Signature
- Management Reporting via **sConsole**
- Secure Passport Scanner – Appended to Reg. Card or Stored Separately (future functionality)

sRemote – System Features

- Software as a Service (SaaS) setup
- No System Maintenance
- PDF Registration Cards stored securely in **sVault**
- GDPR compliant (no storage of personally identifiable information)
